

Cantor Colburn is Top U.S. Patent Law Firm across a Wide Variety of USPTO Technology Centers

February 2023 – [Cantor Colburn LLP](#), one of the country’s largest, full-service intellectual property law firms and the #4 law firm for the most U.S. utility patents obtained in 2022, is ranked in a wide range of the U.S. Patent and Trademark Office’s technology centers and tops the rankings in several key technologies, including:

- #1 Transportation, construction, agriculture, licensing and review
- #3 Mechanical engineering, manufacturing and products
- #5 Chemical and materials engineering
- #7 Communications
- #9 Semiconductors, electrical and optical systems, and components

Harrity Analytics reviewed almost 800 U.S. law firms based on the total number of U.S. utility patents that issued in 2022 where the patent firms were listed on the front of the utility patents. Included are patent firms that have obtained at least 50 utility patents.

In addition to patent preparation and prosecution, Cantor Colburn offers counseling and representation in portfolio management, trademark and copyright, opinion rendering, due diligence in IP transactions, agreements and licensing, anticounterfeiting, trade secrets, post grant proceedings and litigation in federal courts and before the U.S. International Trade Commission. Cantor Colburn is one of the largest, full-service intellectual property law firms in the country, with 100 attorneys, patent agents, and technical advisors serving clients around the world from offices in Hartford, Washington, D.C., Atlanta, Houston and Detroit.
